## Turn Your Chevrolet/GMC Truck into "Quiet Riding Comfort"

Introducing a multi-stage, automotive insulation and sound damping system to give Chevrolet/GMC trucks the "quiet riding comfort" found in today's new cars. AcoustiSHIELD kits are designed on current "state-of-the-art" auto acoustic technology, to insulate and control the noise, vibration and heat in the passenger cabin. Kits are pre-cut and come with easy-to-follow installation instructions- everything you need to do the job right.

## Roof to Road Solutions to Control Automotive Noise, Vibration and Heat

**Damper Pads**

**Heat Shield**

**Pre-Cut - Year, Make, Model Specific**

# Mounting Pins and Clips

American Cars and Trucks used a wide variety of mounting pins, clips, buttons and screws to attach the firewall insulator to the interior of the steel firewall bulkhead. Clean up and reuse your original mounting pins if you have them. We offer the following mounting pins and information based on what we have been able to find available.

UMPS-10	<p><b>Universal Mounting Pins</b></p> <p>If your original firewall mounting pins are missing or damaged beyond repair, these universal pins may be a solution. They are a plastic "Christmas tree" type pin with a 1/2" button "head" that will fit most 5/16 inch holes. Kit includes 10 pins.</p>	20
UWC-MPL-10	<p><b>Universal Wire Cap Mounting Pin-Long</b> A variety of car and truck manufacturers in the 1930s-40s-50s used a wire cap retainer to mount the firewall insulator. Long shank (1/2 inch) with a 1/2 inch button "head" that can be painted to match the firewall color. Kit includes 10 Pins.</p>	10
UWC-MPS-10	<p><b>Universal Wire Cap Mounting Pin-Short</b> A variety of car and truck manufacturers in the 1930s-40s-50s used a wire cap retainer to mount the firewall insulator. Short shank (1/4 inch) with a 1/2 inch button "head" that can be painted to match the firewall color. Kit includes 10 Pins.</p>	10
UPPS-20	<p><b>Universal Upholstery Panel Pin Set</b> If your original upholstery panel mounting pins are missing or damaged beyond repair, these universal pins may be a solution. They are a short-shank plastic "Christmas tree" type pin with a 1/2 inch "head" that will fit 5/16 inch holes. Kit includes 10 pins.</p>	30
FORD 3541-MPL	<p><b>Early Ford Firewall Mounting Pins-Long</b></p> <p>These all steel firewall mounting pins are an exact reproduction of the originals. They are in a 3/4 inch in length. The Long pin works best in the 1935-41 cars and may be used on cars through the mid-fiftys.</p>	3
FORD 3541-MPS	<p><b>Early Ford Firewall Mounting Pin-Short</b></p> <p>These all steel firewall mounting pins are an exact reproduction of the originals. They are in a 1/2 inch in length. The short pins work best for the 1942-48 Ford cars and 1940-47 Ford trucks and may be used on trucks through the mid-fiftys.</p>	3
FORD RB-MP	<p><b>Late Model Ford Firewall Mounting Pins-Rubber Bullet Style</b> These all Rubber Bullet Style Ford mounting pins were used on FOMOCO products starting in 1969. These are an exact reproduction of the original.</p>	3
GM 5500-MP	<p><b>GM Firewall Plastic Firewall Mounting Plugs</b></p> <p>General Motors started using a plastic firewall mounting plug to attach the insulator to the steel firewall bulkhead in 1955 for trucks and 1957 for cars. These plugs are still used in many GM vehicles today.</p>	3
SRMP-9	<p><b>Street Rod Mounting Pin Kit</b></p> <p>With this new mounting pin kit, you can smooth your firewall by welding closed the firewall mounting holes and install any of our insulator panels for that "smoothie look." This kit will give you the option to place the firewall mounting pins where they will fit your application best. <b>Be sure to order your firewall insulator "No Holes" when you place your order.</b> Kit Includes 9 pinsets and instructions.</p>	34

# 1936-38 Chevrolet Truck Headliners

Beginning in 1936, Chevrolet experimented with several roof designs for their half-ton truck cabs, which resulted in much confusion when it comes to selecting the correct interior truck headliner. Illustrated here are two types of headliner cover. To determine which headliner will fit your cab, study the illustrations and carefully measure between the windshield lip and the back window or the rear sheet metal lip where the cover will attach.

## Early Production 1936 Chevrolet Truck Low Cab Headliner

### Early 1936 Chevrolet Truck Low Cab Headliner

Windshield wiper mounted within headliner and optional cutout for wiper control Cover Panel.

**Part Number: CHEV 3600-THKEM**

Measurement: 34 Inches Front to Back.

## Late Production 1936 & 1937-38 Chevrolet Truck Low Cab Headliner

### Late Production 1936 and 1937-38 Chevrolet Truck Low Cab Headliner

Windshield wiper mounted below headliner

**Part Number: Chev 3638-THKLM**

Measurement: 27-1/8 Inches Front to Back.

# 1939-53 Chevrolet & GMC Truck Headliners

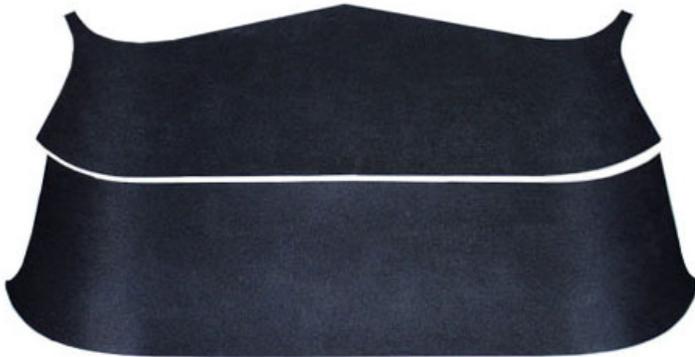

CHEV 3946-THM

Molded Headliner for the 1939-1946 Chevrolet and GMC Trucks. Molded with an ABS Leather Grain material and ready to install with Hardware. This is an after-market product for a smoother, more refined and finished look.

CHEV 4753-THM

Molded Headliner for the 1947-1953 Chevrolet and GMC Trucks. Molded with an ABS Leather Grain material and ready to install with Hardware. This is an after-market product for a smoother, more refined and finished look.

CHEV 4246-THO2

Original Factory Style Two-Piece flat panel headliner for the 1942-1946 Chevrolet and GMC Trucks. ABS Leather Grain material, and ready to install.

CHEV 4749-THO2

Original Factory Style Two-Piece flat panel headliner for the 1947-1949 Chevrolet and GMC Trucks. ABS Leather Grain material, and ready to install.

## Don't Short-Change Your Creature Comforts!

If you are installing a headliner in your truck, this is the time to sound dampen and insulate the metal cab roof to stop the noise, vibration and heat. Our AcoustiShield Thermal Acoustic Barrier Insulation kits will reduce heat transfer 25 plus degrees and stop the "drone" from the large roof panel. Our Chev/GMC Roof Insulation kits include Pads and Heat Shield and are pre-cut and ready to install. Sold Separately.

CHEV 5053-THO2

Original Factory Style Two-Piece flat panel headliner for the 1950-1953 Chevrolet and GMC Trucks. ABS Leather Grain material, ready to install.

# 1947-53 Chevrolet & GMC Suburban Headliner

First Series Trucks with Split Windshield

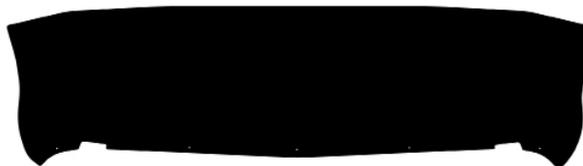

CHEV 4753-SUBHK (116 Wheelbase)

Molded Headliner for the 1947-1953 Chevrolet and GMC Suburban (First Series). This kit includes a molded headliner panel molded to fit the windshield and front crown of the cab over the driver/passenger seating area. Multiple panels cover the interior the length of the roof to the tailgate. Leather Grain material, ready to install with Hardware. This is an after-market product for a smoother, more refined, finished look.

# 1947-53 Chevrolet & GMC Panel Headliner

First Series Trucks with Split Windshield

CHEV 4753-PDHKM

Molded Headliner for the 1947-1953 Chevrolet and GMC Panel Delivery Truck (First Series). This kit includes a molded headliner panel molded to fit the windshield and front crown of the cab over the driver/passenger seating area. Multiple panels cover the interior the length of the roof to the tailgate. Leather Grain material, ready to install with Hardware. This is an after-market product for a smoother, more refined, finished look.

# 1954-59 Chevrolet & GMC Truck Headliners

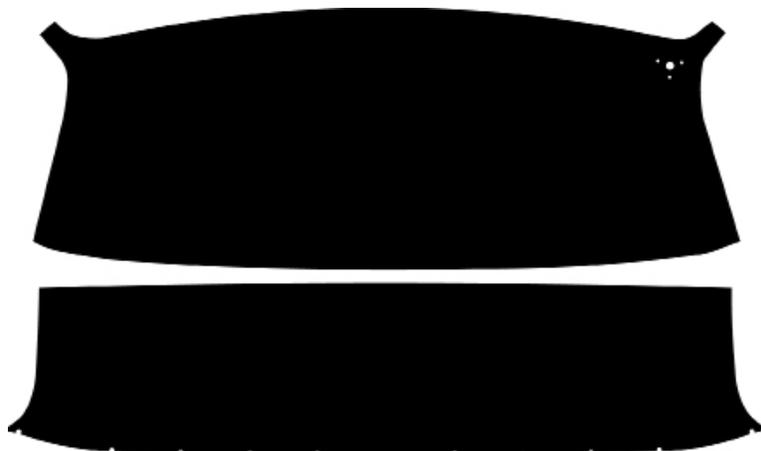

CHEV 5455-THM

Molded Headliner for the 1954-1955 Chevrolet and GMC Trucks. Molded with an ABS Leather Grain material and ready to install with Hardware. This is an after-market product for a smoother, more refined and finished look.

CHEV 5559-THO

Original Factory Style one-Piece flat panel headliner for the 1955-1959 Chevrolet and GMC Trucks. ABS Leather Grain material, and ready to install.

CHEV 5455-THO2

Original Factory Style Two-Piece flat panel headliner for the 1954-1955 Chevrolet and GMC Trucks. ABS Leather Grain material, and ready to install.

CHEV 8091-THK

Original Factory Style One-Piece flat panel headliner for the 1980-1991 Chevrolet and GMC Trucks. ABS Leather Grain material, and ready to install.

# Chevrolet & GMC Truck Firewall Insulators

CHEV 3746-T

CHEV/GMC 1937-1946 Firewall Insulator Panel

Original Factory Style Firewall Insulator for the 1937-1946 Chevrolet and GMC Trucks. Leather Grain material-ready to install with insulation. Molded to fit the stock engine setback hump. May also fit the 1936 Trucks.

CHEV 3946-TSP

CHEV/GMC 1939-1946 Cowl Side Panel Set

Leather Grain material-ready to install.

CHEV 3600-TSP

CHEV/GMC 1936 Cowl Side Panel Set

Leather Grain material-ready to install.

CHEV 3746-TRCC

CHEV/GMC 1937-1946 Truck Rear Cab Cover

Leather Grain material-ready to install with insulation. May also fit the 1936 Trucks.

CHEV 3738-TSP

CHEV/GMC 1937-1938 Cowl Side Panel Set

Leather Grain material-ready to install. May also fit the 1936 Trucks.

CHEV 4400G7-MLT

CHEV/GMC 1944 G-7 Military Truck Firewall Insulator Panel

Original Factory Style Firewall Insulator for the G-7 Military Trucks. Leather Grain material-ready to install with insulation. Molded to fit the stock engine setback hump.

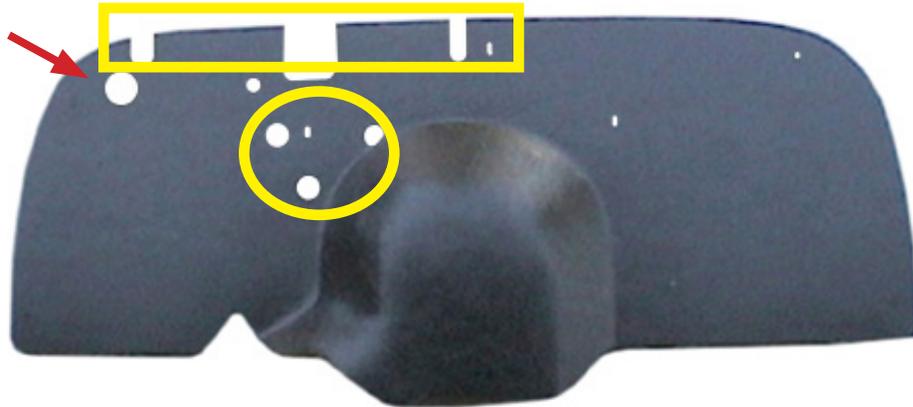

# 1947-54 Chevrolet/GMC Firewall Insulator Panels Factory Hole Variations

General Motors built the 1947-53 Chevrolet and GMC trucks at multiple plants around the United States. While the size and shape of the cowland Firewall Insulator setback hump remain consistent, the location of several holes varies from year to year and plant to plant. This page illustrates the hole configurations that are typically used. **What to look for:**

- 1-The wire bundle pass through hole moves in and out from the edge of the Firewall Insulator.
- 2-The notches on the top of the firewall insulator are different.
- 3-The three holes to the upper left of the hump change layout.

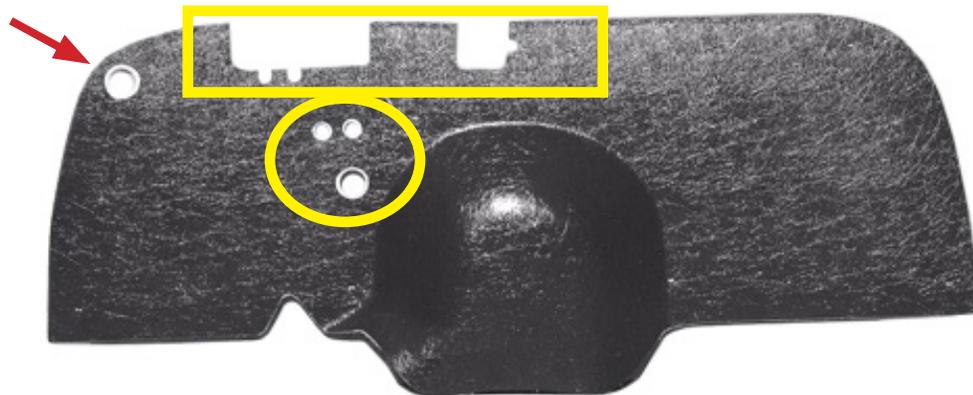

**Print out this page and compare it to your steel Firewall Insulator.**

**Chevrolet  
Type #1 Firewall  
Insulator**  
Commonly fit trucks  
found on the West  
Coast.

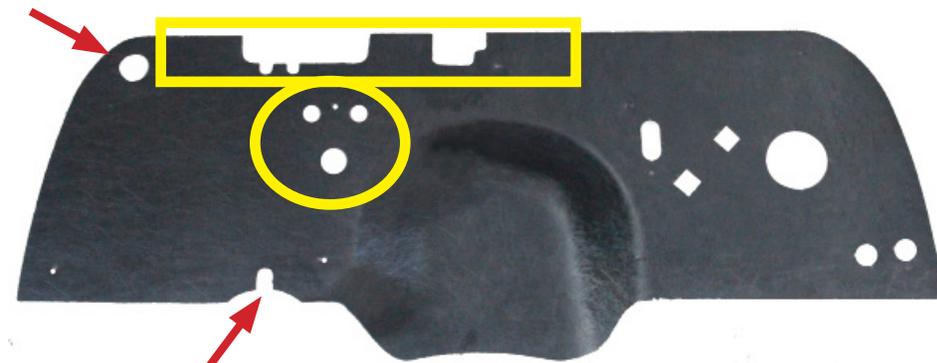

PN# CHEV 4754-T1

**Chevrolet  
Type #2 Firewall  
Insulator** Commonly  
fit trucks found in the  
Central States and  
East Coast.

PN# CHEV 4754-T2

**Chevrolet  
Type #3 Firewall  
Insulator** This one is  
still a mystery!

## Leather Grain ABS

QuietRide General Motors truck headliner products are made from our Leather Grained ABS material that presents a high quality fresh look to any truck interior. All of our products are pre-cut and ready to install and will not chip or peel, absorb moisture, or expand and contract in temperature extremes. The ABS material can be painted with popular upholstery spray paints and wipes clean with a damp cloth.

# AcoustiSHIELD®

## Automotive Thermal Acoustic Insulation

## A Roof to Road Solution to Control Passenger Cabin Noise, Vibration and Heat™

### AcoustiSHIELD Product Description

AcoustiShield is a two-stage thermal acoustic automotive insulation product designed to control Noise, Vibration and Heat—the three major issues that affect passenger cabin comfort. Kits include pre-cut, ready-to-install AcoustiShield Dampener pads and HeatShield Barrier Insulation panels which are packaged separately for easy installation. Kits come with uniquely illustrated installation sheets, spray adhesive and seam tape.

Complete Acoustic Kits insulate the Cowl, Floor, Roof, Trunk Floor, Doors and Body Panels, which includes the seat divider, package tray and rear wheel wells. The installation of a complete AcoustiShield kit typically will reduce passenger cabin noise by 12 to 19 decibels. To put this in perspective, a 10-decibel reduction is a 50 percent reduction in noise that the human ear can easily detect. Barrier insulation will reduce radiant heat by as much as 25 degrees.

### AcoustiShield is a Two-Stage Process

Stage-One of the AcoustiShield process is the application of small pre-cut AcoustiShield Dampener pads and strips to auto body sheet metal to greatly reduce the vibration and noise produced by these panels from entering the passenger cabin.

Stage-Two of the AcoustiShield process is the application of pre-cut HeatShield Barrier Insulation panels to the auto body sheet metal to encapsulate any remaining vibration/noise and to thermally insulate the vehicle.

Quick Link

## Expanded NVH Reference Information:

Cars and trucks make and/or absorb noise, vibration and heat (NVH) from multiple directions-including internal and external air-borne noise, structure-borne noise as well as radiant heat. NVH factors to consider:

- Engine NVH travels back from the front of the vehicle through the Firewall Insulator and cowl.
- Wheel well trunk and rear body panel NVH travels forward through the seat divider and package tray panels.
- Roadway radiant heat, often exceeding 140 degrees, rises through vehicle floor pans.
- Rumbling performance exhaust systems and transmission/drive line harmonics also rise through vehicle floor pans.
- Direct heat from the sun penetrates the roof of the vehicle.

All of these influences “Apex” in the middle of the passenger cabin at ear level.

Add the noise produced by the sound system; the air rushing through the vents from the HVAC system; and a normal conversation builds into a “shouting match” between the driver and passenger to overcome the “harmonic drone” of vehicle mechanics.

# Firewall **INSULATORS**™

**Stop Engine Heat at the Source**

Made Right-Fit Right-Look Right  
OEM Original Products

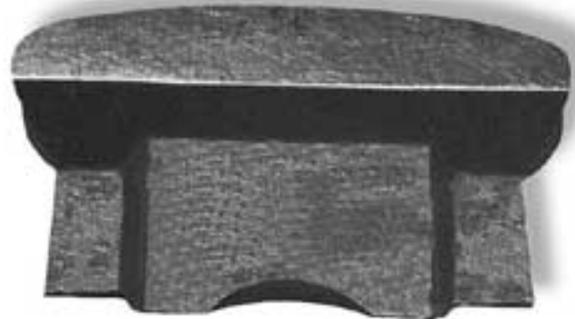

ABS Leather Grain Material

Firewall Insulator products are pre-cut and ready to install with standard OEM accessory and mounting holes punched for restoration applications. Each unit has period correct insulation.

Firewall Insulator Insulators are also available without holes for aftermarket HVAC systems and Street Rod and Custom installs.

“Ultra High Definition”  
Vinyl Rubber

Street Rod Firewall Insulator  
Direct Sheetmetal  
Absolute Sheetmetal

ABS “Chicken Track” Material

# ProductDescription—StreetRodFirewallInsulatorInsulators Direct Sheetmetal Absolute Sheetmetal (formerly Bitchin Products)

Production Period—FOMOCO: 1928 through 1956

Production Period-GM: 1936 through 1972

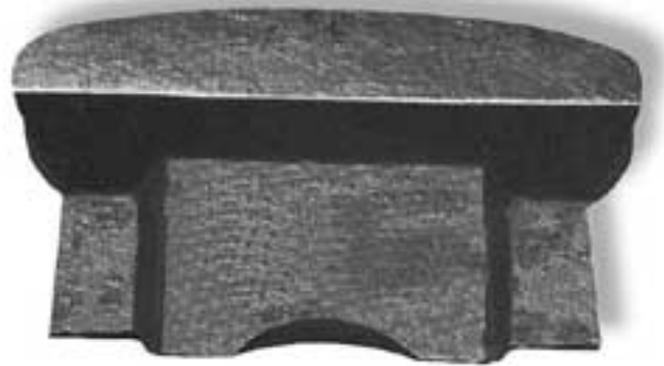

Street Rod Firewall Insulator Insulators are based on the steel after-market

Firewall Insulators that are manufactured by Direct Sheetmetal and Absolute Sheetmetal (formerly Bitchin Products) to stop the heat and noise generated by large engine installed in smaller, older vehicles.

Each insulator product is molded with ABS Leather grain material to fit the steel engine and transmission recess “like a glove.” All street rod products are year, make and model specific, and come ready to install with a double layer of Heat Shield Thermal Barrier insulation pad.

There are no mounting holes or accessory cut-outs so customers can achieve that “smooth” look in the engine bay and passenger compartment.

Customer must decide method of installation. Quiet Ride makes a Street Rod mounting pin kit, available separately.

Each Street Rod Firewall Insulator product is molded from a steel mold provided by the manufacturer to achieve contour and accuracy.  
Year-Make-Model Specific.

## Product Description—

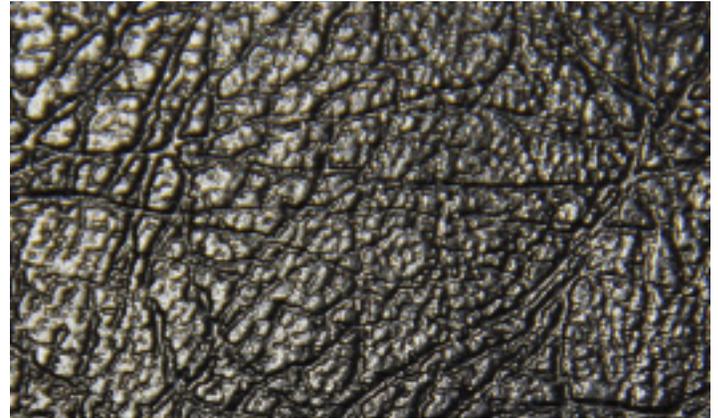

### ABS “Leather Grain”

## Original Equipment Firewall Insulator Insulators

Production Period—GM and MOPAR: 1926 through 1976

Production Period—FOMOCO: 1949 through 1979    ABS Firewall Insulator Cover  
Leather Grain Material

Most OEMs used a leather grained Firewall Insulator cover on their cars and trucks from 1926 through 1965. Each insulator product is molded with ABS material and ready-to-install with factory stock accessory holes and mounting pin locations punched.

Kits does not include mounting pins. Quiet Ride has an assortment of “universal” mounting pin styles available as needed.

Each insulator product is molded from an “out of the car” original Firewall Insulator for contour and accuracy.

Mounting pins are not included but are available for separate purchase as needed.

Year-Make-Model Specific.

Firewall Insulator Insulators can be ordered without holes for custom applications.

# Thermal Insulation Types

## Original Equipment Firewall Insulator Insulators

- General Motors Cars and Trucks
- Ford Cars and Trucks
- MOPAR Cars and Trucks

### Black Fiberglass Insulation

Typically used in vehicles 1949 through 1977

- ABS Firewall Insulator Insulators

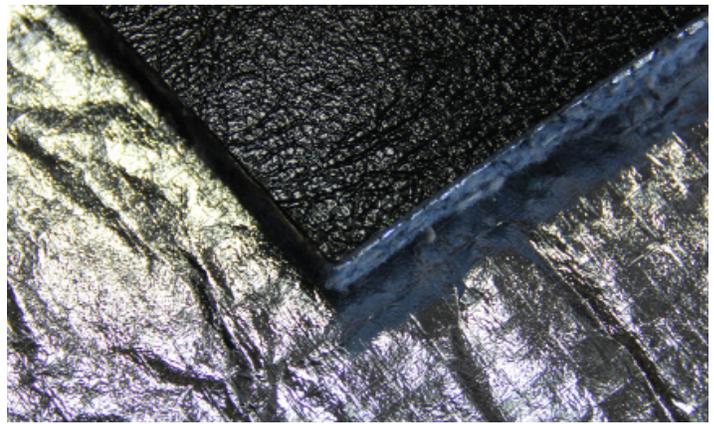

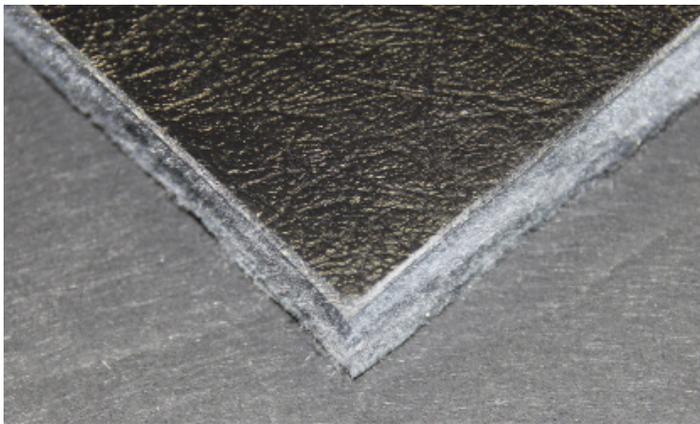

### Heat Shield Barrier Insulation

Typically used in vehicles 1928-48 and

Vinyl Rubber Firewall Insulators

1964-present

- Street Rods
- Custom Firewall Insulators

All QRS Products, Materials and Craftsmanship  
Meet or Exceed OEM Quality Standards

No customer has ever reported losing a judged point on our Firewall Insulator products.

# Firewall Insulator Insulators- A Historical Perspective

The Firewall Insulator is the first line of defense against automotive Noise, Vibration and Heat that is generated in the engine bay of the vehicle.

QRS manufactures more than 600 Firewall Insulator products for antique, classic, custom and street rod cars and trucks. The company has developed these products based on “out of car” original insulator pads that have been supplied by its customers. QuietRide Firewall Insulators are exact reproductions of OEM products.

Most Firewall Insulator insulators made between 1928 and the mid-1960s were constructed with an oil impregnated cardboard cover in combination with a number of insulation materials. In 1964 General Motors and Ford Motor Company began using a “spray-on” rubber material bonded to a thin layer of “shoddy” insulation.

All of the company’s Firewall Insulator products are vacuum form molded to fit the Firewall Insulator and transmission contours exactly. They are digitized and manufactured on its Flow Water Jet Cutting System for accurate fitting. Each Firewall Insulator cover is backed with period correct insulation which could include a black fiberglass or HeatShield barrier insulation.

## Firewall Insulator Colors and “Sheen”

Just a word about the “look” of your old Firewall Insulator in comparison to a new one-you may note that the new Firewall Insulator does not look the same as your original-because of the “sheen.” The

Firewall Insulator in a car built in the 1930s or 40s is now at least 70-80 years old and is dirty and dingy. When the vehicle came off the assembly line, all of its component parts were crisp, clean and sparkling fresh.

With few exceptions, Firewall Insulator insulators were black when they came from the factory. There were some exceptions in the General Motors product line from 1933 through 1941 in which the

Firewall Insulator insulators were a “mocha brown” color. The Firewall Insulator color would typically match the color of your clutch, brake and accelerator pedal rubber pads.
