1960-69 Falcon Catalog

Pre Cut Kits Ready to Install

Roof to Road Solutions to Control Passenger Cabin Noise, Vibration and Heat

Introducing a multi-stage, automotive insulation and sound damping system to give Falcon cars the “quiet riding comfort” found in today’s new cars. AcoustiSHIELD kits are designed on current “state-of-the-art” auto acoustic technology, to insulate and control the noise, vibration, and heat in the passenger cabin. Kits are pre-cut and come with easy-to-follow installation instructions-everything you need to do the job right.

Turn Your Falcon / Fairlane into “Quiet Riding Comfort”

Stage 1 Sound Dampener

The first stage consists of pre-trimmed, self-adhesive, Sound Dampener Pads, bonded to strategically located trouble spots on the floor pan and roof of the vehicle to control body panel vibration and noise. These spots are mapped and labeled in detailed instructions which are included in the kit.

Stage 2 Heat Absorber/Barrier Panels

The second stage uses a high-tech absorber/barrier material, bonded to the body panels, to both sound deaden and insulate the vehicle from radiant heat penetration from the engine and road. Each absorber panel is cut to the correct shape and contour and is mapped and labeled in the detailed instructions.

Kits Include:

- **Stage 1** Pre-Sized Sound Dampener Pads
- **Stage 2** Pre-Trimmed Heat Absorber / Barrier Panels, Spray Adhesive and Sealing Tape
- **Complete Illustrated Installation Instruction**

Dealer program available. For more information contact us at info@quietride.com

Firewall **INSULATORS**™

Stop Engine Heat at the Source

Falcon Firewall Insulators are exact duplicate of the original and are molded to fit the contours of the stock firewall. Starting in 1964, Ford firewall insulators are molded from a high definition rubber material. All insulators include HeatShield insulation, and holes are punched for easy installation. You can order any of the firewall insulators without holes for custom applications.

FALCON 6063-C	1960-1963 Falcon Firewall Insulator Panel. Ultra High Definition Rubber molded exactly like original. Insulation and mounting pins Included.	253.00
------------------	--	--------

FALCON 6465-C	1964-1965 Falcon Firewall Insulator Panel. Ultra High Definition Rubber molded exactly like original. Insulation and mounting pins Included.	253.00
------------------	--	--------

FALCON 6669-C	1968-1969 Falcon Firewall Insulator Panel. Ultra High Definition Rubber molded exactly like original. Insulation and mounting pins Included.	253.00

Falcon & Fairlane Defroster Ducts

These 1966 and 1967 Defroster ducts are common to both the Falcon and Fairlane cars and Ranchero Trucks. They are molded from ABS material and attach to the heater motor defroster outlet. There are two styles: One for vehicles with the factory Heater, and the other for vehicles with factory A/C. Defrosters include metal mounting brackets and a "bug" screen, like the originals.

FALCON 6667HC-DF	1966-1967 Falcon Defroster Duct--Heater Molded ABS Leather	166.75
FAIR 6667HC-DF	1966-1967 Fairlane Defroster Duct--Heater Molded ABS Leather	166.75

FALCON 6667AC-DF	1966-1967 Falcon Defroster Duct--Factory A/C Molded ABS Leather	166.75
FAIR 6667AC-DF	1966-1967 Fairlane Defroster Duct--Factory A/C Molded ABS Leather	166.75

AcoustiSHIELD®

Automotive Thermal Acoustic Insulation

A Roof to Road Solution to Control Passenger Cabin Noise, Vibration and Heat™

AcoustiSHIELD Product Description

AcoustiShield is a two-stage thermal acoustic automotive insulation product designed to control Noise, Vibration and Heat—the three major issues that affect passenger cabin comfort. Kits include pre-cut, ready-to-install AcoustiShield dampener pads and HeatShield Barrier Insulation panels which are packaged separately for easy installation. Kits come with uniquely illustrated installation sheets, spray adhesive and seam tape.

Complete Acoustic Kits insulate the **Cowl, Floor, Roof, Trunk Floor, Doors** and **Body Panels**, which includes the seat divider, package tray and rear wheel wells. The installation of a complete AcoustiShield kit typically will reduce passenger cabin noise by 12 to 17 decibels. To put this in perspective, a 10-decibel reduction is a 50 percent reduction in noise that the human ear can easily detect. Barrier insulation will reduce radiant heat by as much as 25 degrees.

AcoustiShield is a Two-Stage Process

Stage-One of the AcoustiShield process is the application of small pre-cut AcoustiShield dampener pads and strips to auto body sheet metal to greatly reduce the vibration and noise produced by these panels from entering the passenger cabin.

Stage-Two of the AcoustiShield process is the application of pre-cut HeatShield Barrier Insulation panels to the auto body sheet metal to encapsulate any remaining vibration/noise and to thermally insulate the vehicle.

WARNING
Cancer and
Reproductive Harm
www.p65Warnings.ca.gov

Expanded NVH Reference Information:

Cars and trucks make and/or absorb noise, vibration and heat (NVH) from multiple directions--including internal and external airborne noise, structure-borne noise as well as radiant heat. NVH factors to consider:

- Engine NVH travels back from the front of the vehicle through the firewall and cowl.
- Wheel well trunk and rear body panel NVH travels forward through the seat divider and package tray panels.
- Roadway radiant heat, often exceeding 140 degrees, rises through vehicle floor pans.
- Rumbling performance exhaust systems and transmission/drive line harmonics also rise through vehicle floor pans.
- Direct heat from the sun penetrates the roof of the vehicle.

All of these influences “Apex” in the middle of the passenger cabin at ear level.

Add the noise produced by the sound system; the air rushing through the vents from the HVAC system; and a normal conversation builds into a “shouting match” between the driver and passenger to overcome the “harmonic drone” of vehicle mechanics.

ABS “Chicken Track” Material

Product Description—

ABS “Chicken Track Grain”

Early Ford Original Equipment Firewall Insulators

Production Period—FOMOCO: 1928 through 1948

Production Period--Some Early Mopar Vehicles

FOMOCO cars and trucks used a unique “chicken track” texture on their firewall insulator covers from 1928 through 1948. Quiet Ride has faithfully reproduced this famous texture and offers it exclusively on its ABS molded firewall insulators. Each insulator product is molded with an ABS material and ready-to-install with Heat Shield Thermal Barrier insulation, factory stock accessory holes and mounting pin locations punched.

Ford style steel mounting pins are not included but are available for separate purchase as needed.

ABS Firewall Cover Chicken Track Grain Material

**Each insulator product is molded from an “out of the car” original firewall for contour and accuracy.
Year-Make-Model Specific.**

Firewall Insulators can be ordered without holes for custom applications.

Product Description—

ABS “Leather Grain”

Original Equipment Firewall Insulators

Production Period—GM and MOPAR: 1926 through 1976

Production Period—FOMOCO: 1949 through 1979

**ABS Firewall Cover
Leather Grain Material**

Most OEMs used a leather grained firewall cover on their cars and trucks from 1926 through 1965. Each insulator product is molded with ABS material and ready-to-install with factory stock accessory holes and mounting pin locations punched.

Kits does not include mounting pins. Quiet Ride has an assortment of “universal” mounting pin styles available as needed.

Mounting pins are not included but are available for separate purchase as needed.

**Each insulator product is
molded from an “out of the car”
original firewall for contour and
accuracy.**

Year-Make-Model Specific.

**Firewall Insulators can be ordered without holes for
custom applications.**

Product Description—

“Ultra High Definition Vinyl Rubber“ Original Equipment Firewall Insulators for General Motors Cars and Ford Cars and Trucks

FOMOCO and General Motors began using a rubber based firewall material in 1964 with the introduction of the Mustang, Chevelle family and Camaro Cars. Quiet Ride molds these products using a “Ultra High Definition” vinyl rubber. It comes ready to install with a Heat Shield Thermal Barrier insulation pad. Factory stock accessory holes and mounting pin locations are punched.

Kits include appropriate period mounting pins.

**Each insulator product is
molded from an “out of the car”
original firewall for contour and
accuracy.
Year-Make-Model Specific.**

**Firewall Insulators can be ordered without holes for
custom applications.**

Product Description—Street Rod Firewall Insulators

Direct Sheetmetal

Absolute Sheetmetal (formerly Bitchin Products)

Production Period—FOMOCO: 1928 through 1956

Production Period--GM: 1936 through 1972

Street Rod Firewall Insulators are based on the steel after-market firewalls that are manufactured by Direct Sheetmetal and Absolute Sheetmetal (formerly Bitchin Products) to stop the heat and noise generated by large engine installed in smaller, older vehicles. Each insulator product is molded with ABS Leather grain material to fit the steel engine and transmission recess “like a glove.” All street rod products are year, make and model specific, and come ready to install with a double layer of Heat Shield Thermal Barrier insulation pad.

There are no mounting holes or accessory cut-outs so customers can achieve that “smooth” look in the engine bay and passenger compartment.

Customer must decide method of installation. Quiet Ride makes a Street Rod mounting pin kit, available separately.

Each Street Rod Firewall Insulator product is molded from a steel mold provided by the manufacturer to achieve contour and accuracy. Year-Make-Model Specific.

Thermal Insulation Types

Original Equipment Firewall Insulators

- General Motors Cars and Trucks
- Ford Cars and Trucks
- MOPAR Cars and Trucks

Black Fiberglass Insulation

Typically used in vehicles 1949 through 1977

- ABS Firewall Insulators

Heat Shield Barrier Insulation

Typically used in vehicles 1928-48 and
Vinyl Rubber Firewalls 1964-present

- Street Rods
- Custom Firewalls

Authentically Correct---“Fit like a Glove”---Easy to Install

All QRS Products, Materials and Craftsmanship
Meet or Exceed OEM Quality Standards

No customer has ever reported losing judged points on our firewall products.

Firewall Insulators--A Historical Perspective

The Firewall Insulator is the first line of defense against automotive Noise, Vibration and Heat that is generated in the engine bay of the vehicle.

QRS manufactures more than 600 firewall products for antique, classic, custom and street rod cars and trucks. The company has developed these products based on “out of car” original insulator pads that have been supplied by its customers. QuietRide Firewalls Insulators are exact reproductions of OEM products.

Most firewall insulators made between 1928 and the mid-1960s were constructed with an oil impregnated cardboard cover in combination with a number of insulation materials. In 1964 General Motors and Ford Motor Company began using a “spray-on” rubber material bonded to a thin layer of “shoddy” insulation.

All of the company’s firewall products are vacuum form molded to fit the firewall and transmission contours exactly. They are digitized and manufactured on its Flow Water Jet Cutting System for accurate fitting. Each firewall cover is backed with period correct insulation which could include a black fiberglass or HeatShield barrier insulation.

Firewall Colors and “Sheen”

Just a word about the “look” of your old firewall in comparison to a new one--you may note that the new firewall does not look the same as your original--because of the “sheen.” The firewall insulator in a car built in the 1930s or 40s is now at least 70-80 years old and is dirty and dingy. When the vehicle came off the assembly line, all of its component parts were crisp, clean and sparkling fresh.

With few exceptions, firewall insulators were black when they came from the factory. There were some exceptions in the General Motors product line from 1933 through 1941 in which the firewall insulators were a “mocha brown” color. The firewall color would typically match the color of your clutch, brake and accelerator pedal rubber pads.

Mounting Pins and Clips

American Cars and Trucks used a wide variety of mounting pins, clips, buttons and screws to attach the firewall insulator to the interior of the steel firewall bulkhead. Clean up and reuse your original mounting pins if you have them. We offer the following mounting pins and information based on what we have been able to find available.

UMPS-10	Universal Mounting Pins If your original firewall mounting pins are missing or damaged beyond repair, these universal pins may be a solution. They are a plastic "Christmas tree" type pin with a 1/2" button "head" that will fit most 5/16 inch holes. Kit includes 10 pins.	20
UWC-MPL-10	Universal Wire Cap Mounting Pin--Long A variety of car and truck manufacturers in the 1930s-40s-50s used a wire cap retainer to mount the firewall insulator. Long shank (1/2 inch) with a 1/2 inch button "head" that can be painted to match the firewall color. Kit includes 10 Pins.	10
UWC-MPS-10	Universal Wire Cap Mounting Pin--Short A variety of car and truck manufacturers in the 1930s-40s-50s used a wire cap retainer to mount the firewall insulator. Short shank (1/4 inch) with a 1/2 inch button "head" that can be painted to match the firewall color. Kit includes 10 Pins.	10
UPPS-20	Universal Upholstery Panel Pin Set If your original upholstery panel mounting pins are missing or damaged beyond repair, these universal pins may be a solution. They are a short-shank plastic "Christmas tree" type pin with a 1/2 inch "head" that will fit 5/16 inch holes. Kit includes 10 pins.	30
FORD 3541-MPL	Early Ford Firewall Mounting Pins--Long These all steel firewall mounting pins are an exact reproduction of the originals. They are in a 3/4 inch in length. The Long pin works best in the 1935-41 cars and may be used on cars through the mid-fiftys.	3
FORD 3541-MPS	Early Ford Firewall Mounting Pin--Short These all steel firewall mounting pins are an exact reproduction of the originals. They are in a 1/2 inch in length. The short pins work best for the 1942-48 Ford cars and 1940-47 Ford trucks and may be used on trucks through the mid-fiftys.	3
FORD RB-MP	Late Model Ford Firewall Mounting Pins--Rubber Bullet Style These all Rubber Bullet Style Ford mounting pins were used on FOMOCO products starting in 1969. These are an exact reproduction of the original.	3
GM 5500-MP	GM Firewall Plastic Firewall Mounting Plugs General Motors started using a plastic firewall mounting plug to attach the insulator to the steel firewall bulkhead in 1955 for trucks and 1957 for cars. These plugs are still used in many GM vehicles today.	3
SRMP-9	Street Rod Mounting Pin Kit With this new mounting pin kit, you can smooth your firewall by welding closed the firewall mounting holes and install any of our insulator panels for that "smoothie look." This kit will give you the option to place the firewall mounting pins where they will fit your application best. Be sure to order your firewall insulator "No Holes" when you place your order. Kit Includes 9 pinsets and instructions.	34
R-83-56	Early and Mid-Year 1932 Ford Correct insulator panel to dash mounting screws for early and mid-year 1932 passenger car, wagon and sedan delivery. Per Ford Engineering release documents, the correct slotted flat head screws (1/4-20 x 1 3/16), locks, hex nuts and cup washers. Finished in black oxide. Kit includes 12 Sets (48 pieces.) Please Order directly from https://thirdgenauto.com/ford-bolts/	14.95
R-07-01	Ford Original Shoulder Bolts for mid-to-late 1932 through 1935 Cars/Trucks Ford special slotted truss head shoulder screw, painted in Ford S-2 finish. Period correct insulator panel to dash Truss head/Shoulder mounting bolts for mid-to-late 1932-35 car, wagon and sedan delivery. Per Ford Engineering release documents. Kit includes one Shoulder screw, 1/4 lock and 1/4-20 hex nut. FYI: 12 required for 1932 Vehicles and 14 required for 1933-35 vehicles. Please Order directly from https://thirdgenauto.com/ford-bolts/	5.95
