Roof to Road Solutions to Control Passenger Cabin Noise, Vibration and Heat

Introducing a multi-stage, automotive insulation and sound damping system to give Mopar cars the “quiet riding comfort” found in today’s new cars. AcoustiSHIELD kits are designed on current “state-of-the-art” auto acoustic technology, to insulate and control the noise, vibration and heat in the passenger cabin. Kits are pre-cut and come with easy-to-follow installation instructions-**everything you need to do the job right.**

AcoustiHOOD®

Firewall **INSULATORS**™

The barrier between your engine noise and heat and YOU.

Every Quiet Ride Firewall Insulator product is based on an out-the-car or truck original provided by a customer over the years. We now manufacture more than 600 different firewall products-1927 through 1996-from the mold that we have developed to fit the OEM engine setback and transmission hump of each vehicle. Firewall insulator panels are year-make-model specific; vacuum formed from a variety of materials; digitally cut to exacting specifications and come fully insulated and ready-to-install.

They “fit the firewall bulkhead like a glove” and have earned the reputation-
“Concours Quality.”

Here is a Head-to-Head Comparison
between the typical \$69 firewall insulator and a QRS Firewall Insulator. 

- Firewall Insulator is not authentic to OEM specifications.
- Die-Cut from flat rubber or cardboard material-no defined texture.
- Holes don't line up to fit over the engine setback hump or other firewall contours.
- Material cracks or breaks when shipped or handled.
- Material is easily soiled, bruised and scuffed by feet.
- Insulator is a “bummer” to install because it will not fit over the compound curves of the firewall set-back or transmission hump.
- Product fits like a “square peg in a round hole.”
- Firewall Insulator exceeds OEM specifications.
- Molded from well defined textured ABS material (Chicker Tracker Leather Grain) or a “High Definition Satchel” finish vinyl rubber material.
- Holes line up every time because it is molded.
- ABS Material is flexible, yet rigid, so it lands scuff resistant.
- High Def Vinyl Rubber is soil and scuff resistant.
- Insulator is easy to install because it is designed for each specific vehicle to fit over firewall set-back and transmission hump.
- Product “Fits Like a Glove.”

Leather Grain ABS Texture with Fiberglass Ford-GM-Chrysler-AMC 1949-mid 1970's

The Leather Grain texture was used on firewall insulator covers by General Motors, Chrysler, American Motors and Willys/Jeep and Ford Vehicles from 1949 through mid-1970s. It replaces the traditional hot-stamped “oil laminated tarpaper board” used for the firewall insulator cover along with a combination of insulation materials including “horse hair,” cardboard and the “fluffy” fiberglass insulation of the 1950s, 60s, and 70s. Advanced black fiberglass material is much stronger and more dense, yet pliable, yielding a higher thermal rating than original materials. Ready to install.

Made Right - To Fit Right - To Stop Engine Heat

Quiet Ride Firewall Insulators and Headliners are “Concours Quality”

Quiet Ride Firewall Insulator products manufactured with one of our “period correct” materials that presents a high quality, fresh look to any truck interior. Each of these firewall insulator designs are an exact reproduction of an “out of the car/truck” original, provided to us by one of our customers. They are vacuum form molded to the original contours. All firewalls include “Period Correct Insulation” and are pre-cut and ready to install with factory mounting holes punched. They will not chip or peel, or show scuff marks, absorb moisture, or expand and contract with temperature extremes. These materials can be painted with popular upholstery spray paints and wipe clean with a damp cloth.

Leather Grain Texture

Ford Cars and trucks, 1948 to 1979.

**All of our Firewall Insulator Products Can be ordered for Restoration Applications (factory Holes)
or for Restomod Applications (No Holes).**

1960-76 MOPAR "A" Body Car Firewall Insulator Panels

The Firewall bulkhead in 1960s and 1970's MOPAR cars was commonly shared across Dodge and Plymouth "A" Body production lines.

Dodge-Dart Demon and Lancer Plymouth-Barracuda, Duster, Scamp and Valiant

Compare the images in this section of the catalog with the passenger side of your firewall bulkhead to determine which Insulator panel most closely matches the basic hole configuration on your vehicle.

Original Factory Style firewall insulator for the 1970-74
Dodge and Plymouth cars w/Heater. Leather Grain Cover-
ready to install with insulation.

Firewall Insulator can be ordered for Restoration (factory Holes) or for Restomod (No Holes).

Automotive Thermal Acoustic Insulation

A Roof to Road Solution to Control Passenger Cabin Noise, Vibration and Heat™

AcustiSHIELD Product Description

AcustiShield is a two-stage thermal acoustic automotive insulation product designed to control Noise, Vibration and Heat—the three major issues that affect passenger cabin comfort. Kits include pre-cut, ready-to-install AcustiShield damper pads and HeatShield Barrier Insulation panels which are packaged separately for easy installation. Kits come with uniquely illustrated installation sheets, spray adhesive and seam tape.

Complete Acoustic Kits insulate the Cowl, Floor, Roof, Trunk Floor, Doors and Body Panels, which includes the seat divider, package tray and rear wheel wells. The installation of a complete AcustiShield kit typically will reduce passenger cabin noise by 12 to 17 decibels. To put this in perspective, a 10-decibel reduction is a 50 percent reduction in noise that the human ear can easily detect. Barrier insulation will reduce radiant heat by as much as 25 degrees.

AcustiShield is a Two-Stage Process

Stage-One of the AcustiShield process is the application of small pre-cut AcustiShield damper pads and strips to auto body sheet metal to greatly reduce the vibration and noise produced by these panels from entering the passenger cabin.

Stage-Two of the AcustiShield process is the application of pre-cut HeatShield Barrier Insulation panels to the auto body sheet metal to encapsulate any remaining vibration/noise and to thermally insulate the vehicle.

Expanded NVH Reference Information:

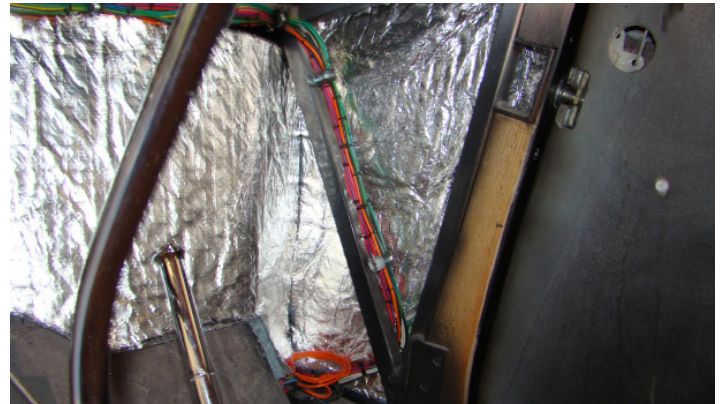

Cars and trucks make and/or absorb noise, vibration and heat (NVH) from multiple directions-including internal and external air-borne noise, structure-borne noise as well as radiant heat. NVH factors to consider:

- Engine NVH travels back from the front of the vehicle through the firewall and cowl.
- Wheel well trunk and rear body panel NVH travels forward through the seat divider and package tray panels.
- Roadway radiant heat, often exceeding 140 degrees, rises through vehicle floor pans.
- Rumbling performance exhaust systems and transmission/drive line harmonics also rise through vehicle floor pans.
- Direct heat from the sun penetrates the roof of the vehicle.

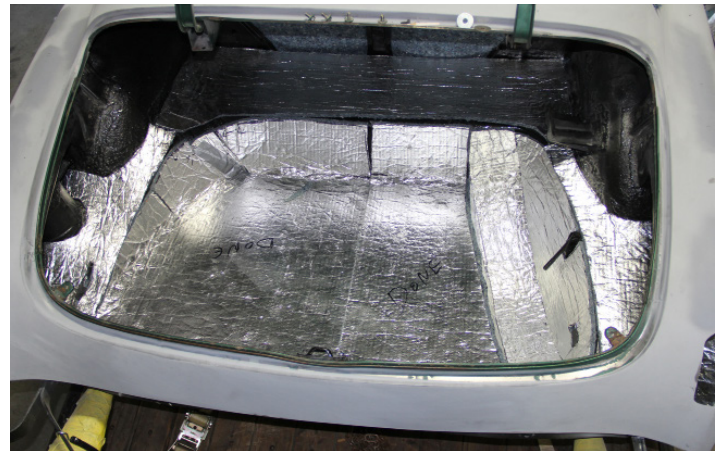

All of these influences “Apex” in the middle of the passenger cabin at ear level.

Add the noise produced by the sound system; the air rushing through the vents from the HVAC system; and a normal conversation builds into a “shouting match” between the driver and passenger to overcome the “harmonic drone” of vehicle mechanics.

Firewall INSULATORS™

Stop Engine Heat at the Source

Made Right•Fit Right•Look Right

OEM Original Products

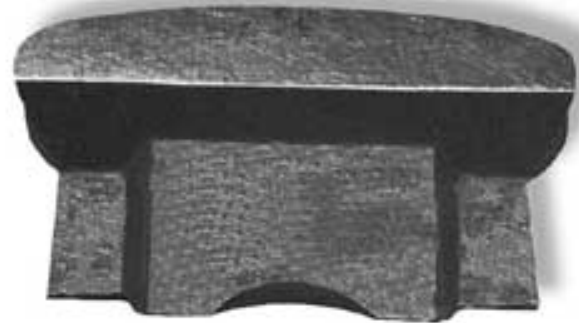

ABS Leather Grain Material

Firewall Insulator products are pre-cut and ready to install with standard OEM accessory and mounting holes punched for restoration applications. Each unit has period correct insulation.

Firewall Insulators are also available without holes for aftermarket HVAC systems and Street Rod and Custom installs.

ABS “Chicken Track” Material

Product Description—

ABS “Leather Grain”

Original Equipment Firewall Insulators

Production Period—GM and MOPAR: 1926 through 1976

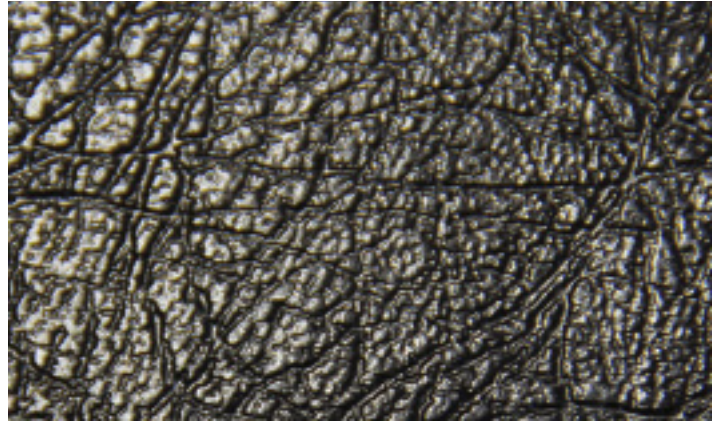

Production Period—FOMOCO: 1949 through 1979

Most OEMs used a leather grained firewall cover on their cars and trucks from 1926 through 1965. Each insulator product is molded with ABS material and ready-to-install with factory stock accessory holes and mounting pin locations punched.

Kits does not include mounting pins. Quiet Ride has an assortment of “universal” mounting pin styles available as needed.

Mounting pins are not included but are available for separate purchase as needed.

ABS Firewall Cover Leather Grain Material

Each insulator product is molded from an “out of the car” original firewall for contour and accuracy.

Year-Make-Model Specific.

Firewall Insulators can be ordered without holes for custom applications.

Thermal Insulation Types

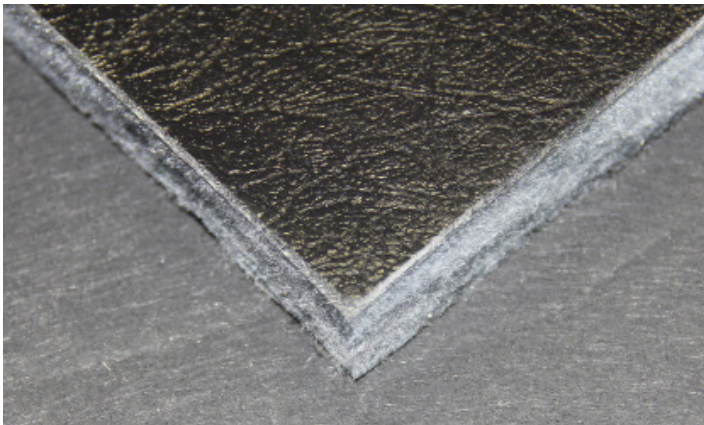

Original Equipment Firewall Insulators

- General Motors Cars and Trucks
- Ford Cars and Trucks
- MOPAR Cars and Trucks

Black Fiberglass Insulation

Typically used in vehicles 1949 through 1977

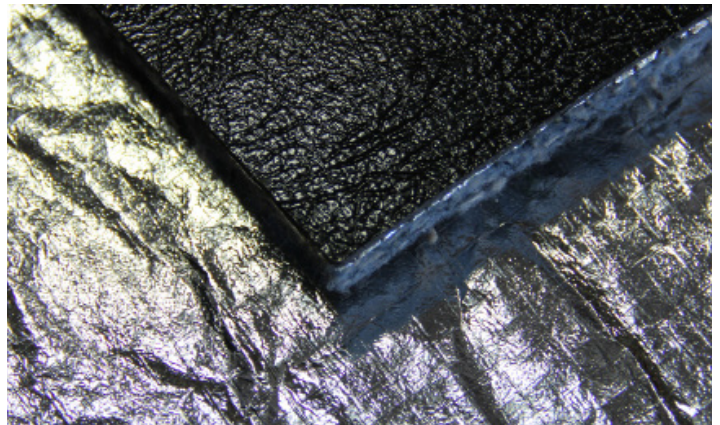

- ABS Firewall Insulators

Heat Shield Barrier Insulation

Typically used in vehicles 1928-48 and Vinyl Rubber Firewalls 1964-present

- Street Rods
- Custom Firewalls

Meet or Exceed OEM Quality Standards

No customer has ever reported losing judged points on our firewall products.

Firewall Insulators-A Historical Perspective

The Firewall Insulator is the first line of defense against automotive Noise, Vibration and Heat that is generated in the engine bay of the vehicle.

QRS manufactures more than 600 firewall products for antique, classic, custom and street rod cars and trucks. The company has developed these products based on “out of car” original insulator pads that have been supplied by its customers. QuietRide Firewalls Insulators are exact reproductions of OEM products.

Most firewall insulators made between 1928 and the mid-1960s were constructed with an oil impregnated cardboard cover in combination with a number of insulation materials. In 1964 General Motors and Ford Motor Company began using a “spray-on” rubber material bonded to a thin layer of “shoddy” insulation.

All of the company’s firewall products are vacuum form molded to fit the firewall and transmission contours exactly. They are digitized and manufactured on its Flow Water Jet Cutting System for accurate fitting. Each firewall cover is backed with period correct insulation which could include a black fiberglass or HeatShield barrier insulation.

Firewall Colors and “Sheen”

Just a word about the “look” of your old firewall in comparison to a new one-you may note that the new firewall does not look the same as your original-because of the “sheen.” The firewall insulator in a car built in the 1930s or 40s is now at least 70-80 years old and is dirty and dingy. When the vehicle came off the assembly line, all of its component parts were crisp, clean and sparkling fresh.

With few exceptions, firewall insulators were black when they came from the factory. There were some exceptions in the General Motors product line from 1933 through 1941 in which the firewall insulators were a “mocha brown” color. The firewall color would typically match the color of your clutch, brake and accelerator pedal rubber pads.

Mounting Pins and Clips

American Cars and Trucks used a wide variety of mounting pins, clips, buttons and screws to attach the firewall insulator to the interior of the steel firewall bulkhead. Clean up and reuse your original mounting pins if you have them. We offer the following mounting pins and information based on what we have been able to find available.

UMPS-10	<p>Universal Mounting Pins If your original firewall mounting pins are missing or damaged beyond repair, these universal pins may be a solution. They are a plastic "Christmas tree" type pin with a 1/2" button "head" that will fit most 5/16 inch holes. Kit includes 10 pins.</p>	20
UWC-MPL-10	<p>Universal Wire Cap Mounting Pin-Long A variety of car and truck manufacturers in the 1930s-40s-50s used a wire cap retainer to mount the firewall insulator. Long shank (1/2 inch) with a 1/2 inch button "head" that can be painted to match the firewall color. Kit includes 10 Pins.</p>	10
UWC-MPS-10	<p>Universal Wire Cap Mounting Pin-Short A variety of car and truck manufacturers in the 1930s-40s-50s used a wire cap retainer to mount the firewall insulator. Short shank (1/4 inch) with a 1/2 inch button "head" that can be painted to match the firewall color. Kit includes 10 Pins.</p>	10
UPPS-20	<p>Universal Upholstery Panel Pin Set If your original upholstery panel mounting pins are missing or damaged beyond repair, these universal pins may be a solution. They are a short-shank plastic "Christmas tree" type pin with a 1/2 inch "head" that will fit 5/16 inch holes. Kit includes 10 pins.</p>	30
FORD 3541-MPL	<p>Early Ford Firewall Mounting Pins-Long These all steel firewall mounting pins are an exact reproduction of the originals. They are in a 3/4 inch in length. The Long pin works best in the 1935-41 cars and may be used on cars through the mid-fiftys.</p>	3
FORD 3541-MPS	<p>Early Ford Firewall Mounting Pin-Short These all steel firewall mounting pins are an exact reproduction of the originals. They are in a 1/2 inch in length. The short pins work best for the 1942-48 Ford cars and 1940-47 Ford trucks and may be used on trucks through the mid-fiftys.</p>	3
FORD RB-MP	<p>Late Model Ford Firewall Mounting Pins-Rubber Bullet Style These all Rubber Bullet Style Ford mounting pins were used on FOMOCO products starting in 1969. These are an exact reproduction of the original.</p>	3
GM 5500-MP	<p>GM Firewall Plastic Firewall Mounting Plugs General Motors started using a plastic firewall mounting plug to attach the insulator to the steel firewall bulkhead in 1955 for trucks and 1957 for cars. These plugs are still used in many GM vehicles today.</p>	3
SRMP-9	<p>Street Rod Mounting Pin Kit With this new mounting pin kit, you can smooth your firewall by welding closed the firewall mounting holes and install any of our insulator panels for that "smoothie look." This kit will give you the option to place the firewall mounting pins where they will fit your application best. Be sure to order your firewall insulator "No Holes" when you place your order. Kit Includes 9 pinsets and instructions.</p>	34
