AcoustiSHIELD™ Pre Cut Kits Ready to Install

Roof to Road Solutions to Control Automotive Noise, Vibration and Heat

Introducing a multi-stage, automotive insulation and sound damping system to give Mopar cars the “quiet riding comfort” found in today’s new cars. AcoustiSHIELD kits are designed on current “state-of-the-art” auto acoustic technology, to insulate and control the noise, vibration and heat in the passenger cabin. Kits are pre-cut and come with easy-to-follow installation instructions----- everything you need to do the job right.

Turn Your Mopar into “Quiet Riding Comfort”

Stage 1
Sound Damper Pads

The first stage consists of pre-trimmed, self-adhesive, Sound Damper Pads, bonded to strategically located trouble spots on the floor pan and roof of the vehicle to control body panel vibration and noise. These spots are mapped and labeled in detailed instructions which are included in the kit.

Stage 2
Heat Absorber/Barrier Panels

The second stage uses a high-tech absorber/barrier material, bonded to the body panels, to both sound deaden and insulate the vehicle from radiant heat penetration from the engine and road. Each absorber panel is cut to the correct shape and contour and is mapped and labeled in the detailed instructions.

Kits Include:

- **Stage 1** Pre-Sized Sound Damper Pads
- **Stage 2** Pre-Trimmed Heat Absorber / Barrier Panels, Spray Adhesive and Sealing Tape
- **Complete Illustrated Installation Instruction**

Dealer program available. For more information contact us at info@quietride.com

Charger and Challenger Customers

50% Discount on New Vehicle Patterns

Attention MOPAR owners: We are looking for MOPAR vehicles to add to our auto insulation library. Bring your car to our shop to pattern and get a 50% discount on a complete AcoustiShield Insulation Kit.

Call 209-942-4777 for details and an appointment.

If you are restoring or building a custom vehicle, now is the time to insulate the interior to give yourself a cool and quiet ride down the road. Most vehicles in years past had little or no factory insulation. We learned to live with the noise then, but you don't have to live with it now.

Our two-stage AcoustiSHIELD Automotive Insulation kits cover the entire interior of the passenger cabin--from the firewall to the tail lights--and will reduce interior noise up to 50 percent and isolate mechanical and environmental heat sources.

Each kit includes Dynamat damper material and Heat Shield, spray adhesive, and seam tape, as well as illustrated installation instructions--everything in one box to do the job right.
