## 1/1 Firewall INSULATORS™

“Fits Like a Glove”

**Made Right - To Fit Right -- To Stop Engine Heat**

*Your first line of defense* against engine noise, vibration and heat is the Firewall Insulator panel--it is the barrier between the engine bay and the passenger cabin. Quiet Ride Firewall Insulators fit like a glove because they match the contours of the stock steel firewall. There are no gaps to allow noise and heat to move into the passenger cabin.

All of our firewall insulator panels are manufactured from original panels that customers have allowed us to use over the last 30 years. Each panel is molded from a leather-grained ABS material and vacuum formed from our own molds to exact OEM factory specifications. Trim welts and rubber carpet skirts are sewn as required. A neoprene rubber is used for late model vehicles to meet factory specifications.

### Custom Firewalls\*

If you are building a “restomod” or custom vehicle, any of our firewall insulator products can be ordered with Heat Shield insulation and without holes for that “smoothie” look. Custom firewall panels can be installed with contact adhesive or by using our Street Rod Firewall Mounting Pin Kit.

### Restoration Firewalls\*

Firewalls are cut and punched with standard factory holes and are shipped ready-to-install with the appropriate “period” insulation attached. Save and reuse your original mounting pins. Universal pins are available should you need them.

**\*Technical Note:** If you have changed the OEM firewall (aside from welding up the mounting and equipment pass-through holes) you may have to look for alternative solutions. Call for suggestions and information.

Molded to fit over the transmission hump and into heater wells, using the highest quality materials available.

Dealer program available. For more information contact us at “[info@quietride.com](mailto:info@quietride.com)”

## Save BIG on your next Street Rod Project!!

Order your Bitchin or Direct Sheetmetal steel firewall products through us and we will include the matching firewall insulator for half price.\*

QuietRide Solutions is an authorized Bitchin and Direct Sheetmetal Reseller.

\*When purchased at the same time.

### Firewall Mounting Pin Options For Older Cars and Trucks

American Cars and Trucks used a wide variety of mounting pins, clips, buttons and screws to attach the firewall insulator to the interior of the steel firewall bulkhead. Clean up and reuse your original mounting pins if you have them. We offer the following mounting pins and information based on what we have been able to find available.

#### Early Ford Firewall Mounting Pins

These all steel firewall mounting pins are a reproduction of the originals. They are available in a 3/4 inch length (Long) and in a 1/2 inch length (Short). The long pins work best for the early production cars and trucks. The Short pin works best for the 1942-48 cars and 1940-47 Trucks. The long pins may have been used in Ford cars as late as 1954. The short pins may have been used in Ford Trucks through the mid 1950s.

- Ford 3541-MPL 1935-41 Ford Firewall Mounting Pin-Long ..... \$3**
- Ford 4147-MPS 1941-47 Ford Firewall Mounting Pin-Short ..... \$3**

#### GM Firewall Mounting Plugs

General Motors started using a plastic firewall mounting plug to attach the insulator in the mid 1950s--1955 for Trucks and 1957 for Cars. These plugs are still used in GM vehicles today.

- GM 5500-MP 1955 to Present General Motors Mounting Plug ..... \$3**

#### Street Rod Mounting Pins

With this new mounting pin kit, you can weld up your firewall mounting holes and install any of our insulators for that "smoothie look." Kit includes nine pin-sets and installation instructions.

- SRMP Street Rod Firewall Mounting Pin Kit ..... \$34**

#### Universal Mounting Pins

If your original firewall mounting pins are missing or damaged beyond repair, these universal pins may be a solution. They are a plastic "Christmas tree" type pin that will fit most 5/16 inch holes. Kit includes 10 pins.

- UMPS-10 Universal Mounting Pin Set ..... \$20**

#### Universal Wire Cap

A variety of car and truck manufacturers in the 1930s used a wire cap retainer to mount the firewall insulator. These are still available in a Long (1/2 inch) and Short (1/4 inch) variety and have a 1/2 inch button head that can be painted. To match the firewall color.

- UWC-MPL Universal Wire Cap Mounting Pin Long ..... \$1**
- UWC-MPS Universal Wire Cap Mounting Pin Short ..... \$1**
