◀ **BACK TO MAIN PAGE**

Your first line of defense against engine noise, vibration and heat is the Firewall Insulator panel--it is the barrier between the engine bay and the passenger cabin. Quiet Ride Firewall Insulators fit like a glove because they match the contours of the stock steel firewall. There are no gaps to allow noise and heat to move into the passenger cabin.

All of our firewall insulator panels are manufactured from original panels that customers have allowed us to use over the last 30 years. Each panel is molded from a leather-grained ABS material and vacuum formed from our own molds to exact OEM factory specifications. Trim welts and rubber carpet skirts are sewn as required. A neoprene rubber is used for late model vehicles to meet factory specifications.

<p>Custom Firewalls*</p> <p>If you are building a “restomod” or custom vehicle, any of our firewall insulator products can be ordered with Heat Shield insulation and without holes for that “smoothie” look. Custom firewall panels can be installed with contact adhesive or by using our Street Rod Firewall Mounting Pin Kit.</p>	<p>Restoration Firewalls*</p> <p>Firewalls are cut and punched with standard factory holes and are shipped ready-to-install with the appropriate “period” insulation attached. Save and reuse your original mounting pins. Universal pins are available should you need them.</p>
--	--

***Technical Note:** If you have changed the OEM firewall (aside from welding up the mounting and equipment pass-through holes) you may have to look for alternative solutions. Call for suggestions and information.

<p>Molded to fit over the transmission hump and into heater wells, using the highest quality materials available.</p> <p>Dealer program available. OEM Firewall Colors

With few exceptions, firewall insulators were black when they came from the factory. There were some exceptions in the General Motors product line. From 1933 through 1941 some firewall insulators came in a “mocha brown” color. We manufacture our new firewall insulators to factory colors unless specified differently by the customer.

AcoustiSHIELD™

Roof to Road Solutions to Control Automotive Noise, Vibration and Heat

If you are restoring or building a custom vehicle, now is the time to insulate the interior to give yourself a cool and quiet ride down the road. Most vehicles in years past had little or no factory insulation. We learned to live with the noise then, but you don't have to live with it for ever.

Our two-stage AcoustiSHIELD Automotive Insulation kits cover the entire interior of the passenger cabine--from the firewall to the tail lights--and will reduce interior noise up to 50 percent and isolate eliminate mechanical and environmental heat sources.

Each kit includes Dynamat damper material and Heat Shield, spray adhesive, and seam tape, as well as illustrated installation instructs--everything in one box to do the job right.

With more than 700 pre-cut, read to install kits available for popular cars and trucks, we are sure to have a kit for your vehicle. See our website for a complete listing of AcoustiSHIELD products.
