©2003-19 • Prices Subject to Change Without Notice
Introducing a multi-stage, automotive insulation and sound damping system to give Dodge trucks the “quiet riding comfort” found in today’s new cars. AcoustiSHIELD kits are designed on current “state-of-the-art” auto acoustic technology, to insulate and control the noise, vibration and heat in the passenger cabin. Kits are pre-cut and come with easy-to-follow installation instructions-----everything you need to do the job right.

Turn Your Dodge into “Quiet Riding Comfort”

Stage 1
Sound Damper Pads

The first stage consists of pre-trimmed, self-adhesive, Sound Damper Pads, bonded to strategically located trouble spots on the floor pan and roof of the vehicle to control body panel vibration and noise. These spots are mapped and labeled in detailed instructions which are included in the kit.

Stage 2
Heat Absorber/Barrier Panels

The second stage uses a high-tech absorber/barrier material, bonded to the body panels, to both sound deaden and insulate the vehicle from radiant heat penetration from the engine and road. Each absorber panel is cut to the correct shape and contour and is mapped and labeled in the detailed instructions.

Kits Include:
• Stage 1 Pre-Sized Sound Damper Pads
• Stage 2 Pre-Trimmed Heat Absorber / Barrier Panels, Spray Adhesive and Sealing Tape
• Complete Illustrated Installation Instruction

Dealer program available. For more information contact us at info@quietride.com

Underhood Cover and Insulation
Smooth Hood Covers For Restoration - 3-D Molded Hood Covers For That Custom Look
The Show Bedder Truck Bed Cover is potentially a new “canvas” for the creative imagination of the restorer, restomoder or custom truck builder.

One of the challenging and expensive areas of truck restoration is the bed floor of the vehicle. Bed floors are made of wood in the early trucks and steel in later model trucks. The floor takes a beating over the years with stuff moving in and out. Wood floors are expensive to replace and steel floors are all but impossible to restore to factory finish. The ShowBedder Truck floor bed cover will hide all of these imperfections and give the vehicle a crisp and clean finished look.

- Manufactured with Ultra High Definition, Scuff Resistant Vinyl Rubber Bed Cover Material.
- Durable light-weight covers show well, and offer complete bed floor protection.
- Includes a hardware mounting kit for customers who want to secure the ShowBedder cover to the truck bed.

**Smooth Truck Floor Bed Cover** (no graphics) for those who want a clean, simple, protective cover for the truck bed floor.

**3-D Logo Truck Floor Bed Cover** for those who want a protective cover and want to “dress up” the bed floor with the truck logo and/or brand name molded into the cover.

**Year-Make-Model Specific. Pre-Cut and Ready-to-Roll-Out.**
American Cars and Trucks used a wide variety of mounting pins, clips, buttons and screws to attach the firewall insulator to the interior of the steel firewall bulkhead. Clean up and reuse your original mounting pins if you have them. We offer the following mounting pins and information based on what we have been able to find available.

<table>
<thead>
<tr>
<th>Ref.</th>
<th>Description</th>
<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>UMP-10</td>
<td>Universal Mounting Pins</td>
<td>If your original firewall mounting pins are missing or damaged beyond repair, these universal pins may be a solution. They are a plastic “Christmas tree” type pin with a 1/2” button “head” that will fit most 5/16 inch holes. Kit includes 10 pins.</td>
</tr>
<tr>
<td>UWC-MPL-10</td>
<td>Universal Wire Cap Mounting Pin—Long</td>
<td>A variety of car and truck manufacturers in the 1930s-40s-50s used a wire cap retainer to mount the firewall insulator. Long shank (1/2 inch) with a 1/2 inch button “head” that can be painted to match the firewall color. Kit 10 pins.</td>
</tr>
<tr>
<td>UWC-MPS-10</td>
<td>Universal Wire Cap Mounting Pin—Short</td>
<td>A variety of car and truck manufacturers in the 1930s-40s-50s used a wire cap retainer to mount the firewall insulator. Short shank (1/4 inch) with a 1/2 inch button “head” that can be painted to match the firewall color. Kit includes 10 pins.</td>
</tr>
<tr>
<td>UPPS-20</td>
<td>Universal Upholstery Panel Pin Set</td>
<td>If your original upholstery panel mounting pins are missing or damaged beyond repair, these universal pins may be a solution. They are a short-shank plastic “Christmas tree” type pin with a 1/2 inch “head” that will fit 5/16 inch holes. Kit includes 10 pins.</td>
</tr>
<tr>
<td>FORD 3541-MPL</td>
<td>Early Ford Firewall Mounting Pins—Long</td>
<td>These all steel firewall mounting pins are an exact reproduction of the originals. They are in a 3/4 inch in length. The Long pin works best in the 1935-41 cars and may be used on cars through the mid-fifties.</td>
</tr>
<tr>
<td>FORD 3541-MPS</td>
<td>Early Ford Firewall Mounting Pin—Short</td>
<td>These all steel firewall mounting pins are an exact reproduction of the originals. They are in a 1/2 inch in length. The short pins work best for the 1942-48 Ford cars and 1940-47 Ford trucks and may be used on trucks through the mid-fifties.</td>
</tr>
<tr>
<td>FORD RB-MP</td>
<td>Late Model Ford Firewall Mounting Pins—Rubber Bullet Style</td>
<td>These all Rubber Bullet Style Ford mounting pins were used on FOMOCO products starting in 1969. These are an exact reproduction of the original.</td>
</tr>
<tr>
<td>GM 5500-MP</td>
<td>GM Firewall Plastic Firewall Mounting Plugs</td>
<td>General Motors started using a plastic firewall mounting plug to attach the insulator to the steel firewall bulkhead in 1955 for trucks and 1957 for cars. These plugs are still used in many GM vehicles today.</td>
</tr>
<tr>
<td>SRMP-9</td>
<td>Street Rod Mounting Pin Kit</td>
<td>With this new mounting pin kit, you can smooth your firewall by welding closed the firewall mounting holes and install any of our insulator panels for that “smoothie look.” This kit will give you the option to place the firewall mounting pins where they will fit your application best. Be sure to order your firewall insulator “No Holes” when you place your order. Kit includes 9 pinsets and instructions.</td>
</tr>

Dodge Truck Firewall Insulator Panels

**Leather Grained ABS**
Quiet Ride Dodge Truck Firewall Insulators, Headliners and Interior upholstery products are made from our Leather Grained ABS material that presents a high quality fresh look to any truck interior. All of our products are pre-cut and ready to install and will not chip or peel, absorb moisture, or expand and contract in temperature extremes. The ABS material can be painted with popular upholstery spray paints and will wipe clean with a damp cloth.

Molded Rib Door Panels

Dodge Truck Interior Kits are an exact duplicate of original patterns supplied by our customers. We use a leather-grained ABS material that will not warp with heat or moisture, scratch or chip. Truck Cowl Panels and the Rear Cab Cover Panel Kit is the same for all years.

The door panel kit on the early trucks (48-50) are molded with the OEM Rib Pattern. The door panels on the later trucks (51-53) are a different shape.

This Kit Includes the 1948-50 “Factory Style” Ribbed Door Panels Illustrated Below

ASU-DDBIK-4 | Universal 4 Door Damper/Barrier Insulation Kit | 131

ASU-DDBIK-4 Universal 4-Door Damper/Barrier Insulation Kit
For 4-Door Sedans with upholstered door panels. Includes Dynamat Xtreme damper pads, WeatherBarrier Insulation, double-sided foam tape and Instructions. Easy to install.

ShowBEDDER Truck Bed Covers for Classic Trucks & AcoustiHOOD Kits are available for this vehicle.
AcoustiSHIELD®
Automotive Thermal Acoustic Insulation

A Roof to Road Solution to Control
Passenger Cabin Noise, Vibration and Heat™

AcoustiSHIELD Product Description
AcoustiShield is a two-stage thermal acoustic automotive insulation product designed to control Noise, Vibration and Heat—the three major issues that affect passenger cabin comfort. Kits include pre-cut, ready-to-install Dynamat Xtreme® damper pads and HeatShield Barrier Insulation panels which are packaged separately for easy installation. Kits come with uniquely illustrated installation sheets, spray adhesive and seam tape.

Complete Acoustic Kits insulate the Cowl, Floor, Roof, Trunk Floor, Doors and Body Panels, which includes the seat divider, package tray and rear wheel wells. The installation of a complete AcoustiShield kit typically will reduce passenger cabin noise by 12 to 17 decibels. To put this in perspective, a 10-decibel reduction is a 50 percent reduction in noise that the human ear can easily detect. Barrier insulation will reduce radiant heat by as much as 25 degrees.

AcoustiShield is a Two-Stage Process

Stage-One of the AcoustiShield process is the application of small pre-cut Dynamat Xtreme® damper pads and strips to auto body sheet metal to greatly reduce the vibration and noise produced by these panels from entering the passenger cabin.

Stage-Two of the AcoustiShield process is the application of pre-cut HeatShield Barrier Insulation panels to the auto body sheet metal to encapsulate any remaining vibration/noise and to thermally insulate the vehicle.

**Expanded NVH Reference Information:**
Cars and trucks make and/or absorb noise, vibration and heat (NVH) from multiple directions—including internal and external air-borne noise, structure-borne noise as well as radiant heat. NVH factors to consider:

- Engine NVH travels back from the front of the vehicle through the firewall and cowl.
- Wheel well trunk and rear body panel NVH travels forward through the seat divider and package tray panels.
- Roadway radiant heat, often exceeding 140 degrees, rises through vehicle floor pans.
- Rumbling performance exhaust systems and transmission/drive line harmonics also rise through vehicle floor pans.
- Direct heat from the sun penetrates the roof of the vehicle.

All of these influences “Apex” in the middle of the passenger cabin at ear level.

*Add the noise produced by the sound system; the air rushing through the vents from the HVAC system; and a normal conversation builds into a “shouting match” between the driver and passenger to overcome the “harmonic drone” of vehicle mechanics.*

Firewall Insulator products are pre-cut and ready to install with standard OEM accessory and mounting holes punched for restoration applications. Each unit has period correct insulation.

Firewall Insulators are also available without holes for aftermarket HVAC systems and Street Rod and Custom installs.

Product Description—

ABS “Leather Grain”

Original Equipment Firewall Insulators

Production Period—GM and MOPAR: 1926 through 1976
Production Period—FOMOCO: 1949 through 1979

Most OEMs used a leather grained firewall cover on their cars and trucks from 1926 through 1965. Each insulator product is molded with ABS material and ready-to-install with factory stock accessory holes and mounting pin locations punched.

Kits does not include mounting pins. Quiet Ride has an assortment of “universal” mounting pin styles available as needed.

Mounting pins are not included but are available for separate purchase as needed.

Firewall Insulators can be ordered without holes for custom applications.
Thermal Insulation Types

Original Equipment Firewall Insulators

- General Motors Cars and Trucks
- Ford Cars and Trucks
- MOPAR Cars and Trucks

Black Fiberglass Insulation
Typically used in vehicles 1949 through 1977
- ABS Firewall Insulators

Heat Shield Barrier Insulation
Typically used in vehicles 1928-48 and
Vinyl Rubber Firewalls 1964-present
- Street Rods
- Custom Firewalls

Meet or Exceed OEM Quality Standards

No customer has ever reported losing judged points on our firewall products.
Firewall Insulators--A Historical Perspective

The Firewall Insulator is the first line of defense against automotive Noise, Vibration and Heat that is generated in the engine bay of the vehicle.

QRS manufactures more than 600 firewall products for antique, classic, custom and street rod cars and trucks. The company has developed these products based on “out of car” original insulator pads that have been supplied by its customers. QuietRide Firewalls Insulators are exact reproductions of OEM products.

Most firewall insulators made between 1928 and the mid-1960s were constructed with an oil impregnated cardboard cover in combination with a number of insulation materials. In 1964 General Motors and Ford Motor Company began using a “spray-on” rubber material bonded to a thin layer of “shody” insulation.

All of the company’s firewall products are vacuum form molded to fit the firewall and transmission contours exactly. They are digitized and manufactured on its Flow Water Jet Cutting System for accurate fitting. Each firewall cover is backed with period correct insulation which could include a black fiberglass or HeatShield barrier insulation.

Firewall Colors and “Sheen”

Just a word about the “look” of your old firewall in comparison to a new one--you may may note that the new firewall does not look the same as your original--because of the “sheen.” The firewall insulator in a car built in the 1930s or 40s is now at least 70-80 years old and is dirty and dingy. When the vehicle came off the assembly line, all of its component parts were crisp, clean and sparkling fresh.

With few exceptions, firewall insulators were black when they came from the factory. There were some exceptions in the General Motors product line from 1933 through 1941 in which the firewall insulators were a “mocha brown” color. The firewall color would typically match the color of your clutch, brake and accelerator pedal rubber pads.
